

ECOMARINES WASTE NOT CHALLENGE

This challenge will require you to get creative, and help your family think about waste! There are lots of materials that end up in the bin that can be made into a beautiful piece of art.

STEP 1.

Talk to your parents about the top 3 waste items are from your house. Start collecting these items and make sure they're clean for Step 2!

STEP 2.

Decide what kind of artwork you would like to make, and keep collecting waste items until you have enough to create your masterpiece. Here are some ideas:

- A sculpture of an animal
- A poster about reducing, reusing, recycling and refusing
- A collage of an ecosystem (good if you have a lot of different coloured trash items)
- Wearable art - make a piece of clothing out of your trash!

STEP 3.

Show your artwork to your family, and have a chat about how you could reduce these items.

STEP 4.

Take a photo and ask your parents to send us an email to info@ecomarines.com or post a photo on social media and tag us! Use the hashtags [#ecomarines](#) [#ecomarinesmission](#) [#wastenot](#)
